Coughing or sneezing: \_\_\_\_\_

Vomiting or diarrhea: \_\_\_\_\_

Loss of appetite: \_\_\_\_\_

Lethargy: \_\_\_\_\_

Pain of any kind: \_\_\_\_\_

❖ Important Medical History: \_\_\_\_\_

❖ Current Medications: \_\_\_\_\_

## **\*\*\*\*Pre-Anesthetic Testing:**

Like you, our greatest concern is the well being of your pet. Before putting your pet under anesthesia, we will perform a physical examination. However, many conditions may go undetected without specific testing. For this reason, we **strongly** recommend that all patients receive a blood screen before undergoing anesthesia.

**BASIC PANEL \$80.00 Will screen for kidney and liver disease**

**COMPREHENSIVE PANEL \$235.00, REQUIRED for cats 10 years and older, who haven't had bloodwork in 4 months to screen for common senior cat diseases**

**NO, I decline any blood screen at this time and understand the risk involved**

## **Anesthesia / Surgery/ Treatment Consent:**

1) Cheshire Cat Hospital has permission to perform the following procedure(s):

\_\_\_\_\_

2) I understand that conditions may arise during the procedure whereby a different or additional procedure may need to be performed, and I authorize my veterinarian to do what he/she feels is necessary and in the best interest of my pet.

3) I understand the nature of the procedure and the risks involved. I understand that complications including but not limited to infection, cardiac arrest, and death could result. I acknowledge that no guarantee has been made as to result or cure.

4) Dental Radiography is used to see healthy as well as problem teeth and to see if remnants of teeth are present if teeth had previously been removed or fell out on their own. I understand that The Cheshire Cat Hospital **DOES NOT** have or offer dental radiography. All the extractions are completed based on visual and experience of the doctor and staff. For the health of the animal, if a tooth is missing, The Cheshire Cat Hospital does not open the gum to probe for remaining remnants.
